

Tampere. Finland

Dear sir,

I am applying for the position of "Frontend Developer Intern, Kreativstorm " at your renowned company. I have found the job circular in LinkedIn.

As a full stack developer with more than three years of hands-on experience, I have honed my skills in PHP and MySQL. I bring a solid foundation in HTML, CSS, and JavaScript, along with a good understanding of Node JS and React JS with a know how of Vue Js. I am interested and ready to explore other technologies as per the company needs.

Currently I am in the final year of my MSc degree at Tampere University in Software Engineering. Most of the courses provide online material so I can shift to other locations as per need. I have completed a Mernstack Bootcamp and earned a [certificate](#).

I believe different technologies are just tools and won't be an issue as I already have the basics. I am confident that my fast-learning ability and passion for learning new technologies will make me a valuable addition to your team. I'm excited about the opportunity to contribute to your projects and be part of your dynamic team.

Thank you for considering my application. I look forward to the possibility of joining your company and contributing to its continued success.

Sincerely,

Nasir Uddin Shuvo
